BYU IDAHO | Creating Your Homepage
CS 313

Objective

The purpose of this assignment is to review a minimal level of client-side programming, and provide a homepage from which you can link to future assignments.

Guidelines

Consider the following guidelines as the minimum standard for this assignment:

- Professional look and feel
- Do not use an HTML generator / layout program (e.g., DreamWeaver, FrontPage, Visual Studio designer tools). Please write the HTML for this page from scratch.
- Put all styles in an external stylesheet (no inline styles)
- Have at least two pages, one as an introduction to yourself, and one that will have links to assignments (for now the assignments page can say "Coming soon" or something similar).
- At least one image
- Something dynamic (e.g., mouse-overs, menus, on-click, on-change, etc.)
- Include reasonable colors, images, etc. to show your creativity and personality (but don't forget to keep it somewhat professional).
- No run-time errors

As always, you are encouraged to go above and beyond these guidelines.
